Druck DPI610E Series

Product comparison guide versus legacy and existing units

Built on a legacy

The iconic Druck is back. Retaining the iconic handle, the ease of use and the robust, reliable design of the Druck DPI600 series, the DPI610E is the flagship calibrator in the Druck Expert product range.

The DPI610E handheld pressure calibrator has been designed using the latest advances in pressure measurement technologies, combined with a range of much loved features from the legacy DPI605/610/615 units.

Designed by technicians, for technicians

The unit combines pressure generation, signal measurement and loop power with significantly improved pump capabilities and a powerful touch and button user interface. Including a 90+ hour battery life from 2 hour charge, and an internal barometer with barometer port for easy calibration, the DPI610E is an ideal solution to a range test and calibration applications.
